## **METHOD AND IMPLANT FOR CURING CYSTOCELE**

### **SUMMARY:**

The invention concerns an implant for the treatment of cystocele, having a thin and supple structure, characterised in that it comprises a support body (2) from which extend at least:

- two anterior suspension straps (3) arranged on both sides of the sagittal plane (S),
- two posterior suspension straps (4), arranged on both sides of the sagittal plane (S),
- and two middle suspension straps (5) arranged on both sides of the sagittal plane (S) and between the anterior and posterior straps (3) and (4).

Application to the treatment of cystocele.
